

**YOUR INTRODUCTION
TO THE DIGITAL
WORLD OF VOLLMER**

**THE VOLLMER
IoT STARTER
PACKAGE**

CREATE YOUR DIGITAL BASIS

Network machines globally, design processes to be more flexible and efficient, detect errors, and optimise processes.

Boost your company's growth by integrating smart technologies. Everything that you need for this is contained in the VOLLMER IoT Starter Package: The ideal introduction to digitalisation.

//// VOLLMER DASHBOARD

The VOLLMER Dashboard for visualising machine data: Access live detailed machine status information. At any time, from any device, from anywhere in the world. You always maintain an overview of the basic data for your machines and the machine utilisation. And you therefore achieve the highest degree of transparency.

//// VOLLMER IOT GATEWAY

With the VOLLMER IoT Gateway, you can connect your machine to a digital environment, which therefore allows for a flow of data.

//// STANDARD PROTOCOLS

Standardised interfaces and protocols (e.g. OPC UA, MTConnect) mean that data can be effortlessly exchanged between our machines and your applications.

//// OPERATOR NOTIFICATIONS

Store communication relationships and connect to machine parameters. Receive automated notifications on various devices and display values in a standardised format. Make use of our prefabricated processes or easily create your own flows using the Node-RED open-source system.

THE VOLLMER IOT STARTER PACKAGE

The VOLLMER IoT Starter Package makes your introduction to the world of digital production extremely easy. It contains the IoT Gateway as a necessary hardware component, the pre-configured VOLLMER Dashboard and the Node-RED system. This prepares your machine to be used with current and future digital VOLLMER solutions.

Take the first step towards digitalisation and make the IoT Starter Package an integral part of your new machine. For existing machines, you certainly have the option to retrofit the IoT Gateway and its associated digital services.

//// PACKAGE DETAILS:

// Period of validity: 12 months

// Included in the scope of delivery:
IoT Gateway, software licences,
certificates and updates

// Offer valid until the end of May 2020

For further information, contact your usual VOLLMER contact partner or contact us by telephone +49 (0) 7351 5710 or by e-mail info@vollmer-group.com.

V@dison

digital solutions

V@ screen

All the relevant machine parameters at a glance and under your control.

V@ check

Experiment, analyse, optimise. Reduce downtimes.

V@ boost

Increase workpiece-specific performance, exploit potential to the full: With smart software tools.

V@ guide

Preventive maintenance, avoid errors, share knowledge.
